

Standard Fire Ladder
has limited reach of
100 feet (30 m).

HEAVY LIFTING
DRONE can reach
nearly 1000 feet
(over 300 m) in
about 6 minutes.

Cable and Hose for
electricity and water
means unlimited
flight time.

PyroUHP technology takes you to new heights.

In fact, heights previously completely out of reach
for traditional fire fighting.

With our Ultra High Pressure Technology, we deliver 20GPM@1400PSI within 6 minutes at 1000 foot altitude. Adding class A foam to our attack allows you to either hold a previously out-of-reach high rise fire in check or launch a rapid exterior attack on the fire floor for total extinguishment.

Specifications:

- PyroUHP Drone module
- 55 HP Diesel
- 20GPM@1400PSI
- 1000' Altitude with uninterrupted continuous flight time via tethered supply line.
- Rapid deployment via auto retract hose reel for instantaneous deployment.
- Autonomous flight for prolonged fire attack.
